Finding of Violation

The United States Environmental Protection Agency finds that Balkema Excavating, Inc. (Balkema) is violating Section 111(e) of the Clean Air Act, 42 U.S.C. § 7411(e). Specifically, Balkema, at its Midway Aggregates Plant, violated the New Source Performance Standards (NSPS) General Provisions at 40 C.F.R. §§60.7 and 60.8, as follows:

Regulatory Authority

1. The NSPS for Nonmetallic Mineral Processing Plants at 40 C.F.R. Part 60, Subpart 000, applies to the following affected facilities, which commenced construction, reconstruction, or modification after August 31, 1983, in fixed or portable nonmetallic mineral processing plants: each crusher, grinding mill, screening operation, bucket elevator, belt conveyor, bagging operation, storage bin, enclosed truck or railcar loading station.
2. "Affected facility" under the NSPS means, with reference to a stationary source, any apparatus to which a standard is applicable. 40 C.F.R. § 60.2.
3. The NSPS at 40 C.F.R. § 60.7(a)(1) requires owners or operators subject to the NSPS to furnish to the Administrator written notification of the date construction of an affected facility is commenced postmarked no later than 30 days after such date.
4. The NSPS at 40 C.F.R. § 60.7(a)(2) requires owners or operators subject to the NSPS to furnish to the Administrator a written notification of the anticipated date of the initial startup of an affected facility postmarked not more than 30 days prior to such date.
5. The NSPS at 40 C.F.R. § 60.7(a)(3) requires owners or operators subject to the NSPS to furnish to the Administrator a written notification of the actual date of initial startup of an affected facility postmarked within 15 days after such date.

6. The NSPS at 40 C.F.R. § 60.8(a), requires that within 60 days after achieving the maximum production rate at which the affected facility will be operated, but not more than 180 days after initial startup of the facility, the owner or operator of the facility shall conduct performance test(s) and furnish the Administrator a written report of the results of the performance test(s).

Balkema's Midway Aggregates Plant

7. Balkema owns and operates a sand and gravel plant designated as the Midway Aggregates Plant at 15600 E. Michigan, Climax, Michigan.
8. Balkema's Midway Aggregates Plant is subject to the requirements of the NSPS at 40 C.F.R. § 60.7(a)(1) - (3) and § 60.8(a), because all "affected facilities" at the plant were constructed and began operation on April 1, 1994.

Violations

9. Balkema violated the NSPS at 40 C.F.R. § 60.7(a)(1), § 60.7(a)(2) and § 60.7(a)(3), because it did not provide to the Michigan Department of Environmental Quality notification of the date construction of the facility commenced, the anticipated date of startup and the actual date of startup of the Midway Aggregates Plant until July 27, 1999.
10. Balkema violated the NSPS at 40 C.F.R. § 60.8(a), because it did not conduct performance tests on the affected facilities at the Midway Aggregates Plant until July 13, 14, and 21, 1999.
